

## CADASTRAL SERVICES

### **We develop for the future**

By developing our business towards digital cadastral services, we make our services more efficient and reduce administration times.

### **New e-service for digital applications**

Now, with the aid of an e-ID, it is possible to apply for partition, land consolidation and other common types of services via [lantmateriet.se](http://lantmateriet.se). After three months of the new e-service, we had received 559 applications.

### **50 addresses became 1**

Previously, cases of new cadastral surveys were sent to the nearest surveying office. Now there is just one address. This makes applications easier and means that cases are handled more efficiently.

## LAND REGISTRATION

### **We are developing a new deposit system**

In 2017, we took an important step in the development of a modern, sustainable deposit system. We plan to have it in operation by 2019. It is being developed in accordance with current legislation on mortgages but must also accommodate a legal system other than the one we have at present.

### **More people are connecting to our e-services**

More of our larger customers, such as banks, have connected to our e-services during the year. The e-services mean shorter lead times, higher quality and more decisions granted.

### **Legal support for new e-services**

In 2017, we have legal support for a new e-service that makes it possible for everyone who has a valid e-ID to digitally apply for registration of title, site-leasehold rights and mortgages. Digitisation leads to more secure and faster processing of applications.

## GEODATA

### **Create your own map**

In 2017, we introduced the new e-service Kartutskrift [Map Print-out], which enables the general public to print out map images of a required area at 1:10000 and 1:50000 scale.

### **Historical photomaps as open data**

We have released historical photomaps as open data and users can now download these from our website at [lantmateriet.se](http://lantmateriet.se).

### **Laser scanning**

The National Board of Forestry has been allocated SEK 12 million per year to work with the National Land Survey to initiate continuously recurring laser scanning of Sweden for forestry purposes.

## EVERY PLACE IN SWEDEN

Along every road, behind every clump of grass and under every stone. Every jetty, every roof, every path and every field. The castle, the hut and the cottage. The park, the illuminated ski track and the meadow. Every turning area, every exit road and every main road. The sports arena, the ski slope and the coffee shop on the corner. Every built-up area, suburb and city centre. The meeting place, the hiding place and the special places. The National Land Survey is familiar with every place in Sweden. We are keeping an eye on the width, height, length and diagonal. We map out reality, set the boundaries and keep track of who owns what.

**1,883,000,000**

In 2017, the National Land Survey's total sales amounted to SEK 1,883 million.

**100,000**

The National Land Survey provided extensive support for the Swedish Armed Forces' exercise Aurora 17, including in the form of digital map packages for system solutions and over 100,000 printed maps that were distributed to participating units and staffs.

**98**

98 percent of the surface of Sweden has now been laser scanned for data for a new elevation model of the country.

**59**

59 percent of our employees are women and 41 percent are men.

**52,000,000,000,000**

The total mortgage amount is SEK 5,2 billion.

LANTMÄTERIET

Annual Report, May 2018

**39**

There are municipal survey offices in 39 Swedish municipalities.

**2,128**

We have 2,128 employees in 50 locations.

**293**

For easier access to geodata, there is now a total of 293 parties in the geodata collaboration, of which 253 are municipalities.

**40,000,000**

During the year, our service exports have participated in projects and feasibility studies in 14 countries. Our operations had total sales of SEK 40 million.

**45**

The average age of our employees is 45.

**13,788**

We completed 13,788 cadastral surveys during the year.

LANTMÄTERIET

**3,514,472**

The number of animate objects in the general part of the property registry is 3,514,472.

**818,609**

We made decisions in 818,609 registration cases, with registrations of title and mortgages predominating.

**70**

Fees and other payments accounted for 70 percent of our revenues. The remainder consist of allocations.

**620,000**

400,000 telephone calls and 220,000 e-mails were handled in 2017 via our Customer Centre – a total of 620,000 customer contacts. Waiting time averaged 17.6 seconds (and in December the figure was down to 10 seconds).

**141,400**

In 2017, we took aerial photographs of approximately 141,400 km<sup>2</sup> of Sweden's surface.
